Deckblatt für die Abgabe der Obungsaufgaben
  Name, Vorname: Frank, Jonathan
  Studon - Kennung:
                          yk34alis
                                                        21/24 * 33 = 29
 Blatt - Nr:
                          01
 Obours roppen - UR:
Die folgenden Abgaben gebe ich zur Konektur frei: A1, A2, A3
         a) \inf(M) = \sqrt{3}, \sup(M) = \sqrt{5}, \max(M) = \text{existient nicht } \min(M) = \sqrt{3}
         b) inf (M) = 1/4, sup (M) = 2/3 / max (M) = 3/3, min (M) = 1/4 V
         c) inf(M) = 0, Sup(M) = 1/2 / max(M) = 1/2, min (M) = existient wicht
         d) inf(M) = 3, sup(M) = +00, max(M) = existient wicht, min (M) = 3 -linfty bzw. exist
         e) inf(M) = 0, sup(M) = 1; max(M) = 1, min(M) = existion + wicht
         f) inf(h) = 3/3, Sup(M) = +00, max(M) = existing uicht, min(M) = 2/3
         a) inf(M)= 1, sup(M) = +00/max(M) = existint nicht, min (M) = existint nicht
(\overbrace{A2}) i) \frac{3n + 4m}{5n^2 + 10} \leq \frac{3n + 4 \cdot (3n)}{5n^2 + 10} \neq \frac{3n}{5n^2 + 10} = \frac{3n}{n^2 + 2}
      \frac{11}{2n} \leq \frac{5n-2n}{2n} \neq \frac{3n}{2n} \neq \frac{3}{2}
      \frac{n}{n+m} \leq \frac{n}{n+2n} = \frac{n}{3n} = \frac{1}{3}
      \frac{|v|}{|v|} \frac{n+m}{|v|} \leq \frac{n+3n}{|v|} = \frac{4n}{|v|}
      V) \underbrace{S_{n-m} + 3 \cdot 2^{m}}_{3n^{3} - m + 3} = \underbrace{S_{n-2n+3} \cdot 2^{3n}}_{3n^{3} - 3n + 3} = \underbrace{3_{n+3} \cdot 2^{3n}}_{3(n^{3} - n + 3)} = \underbrace{n+2}_{n^{3} - n + 3}
      Vi) \quad m + n + sin(m) = sin(17m^2) + 2^m + 2^{-m} \le 3n + n + 1 + 1 + 2^{3n} + 2^{-2n}
hockstew 1 \qquad hockstew 1 \qquad ... < 4n + 2 + 2^{3n} + 2^{-2n}
                           - 0-3- 5-16-37-
```

(13) a) 
$$a_{n+1} - a_{n+2} = 0$$

i)  $6\pi \frac{2n+3n}{n+4+3} - \frac{2n}{n+3} = \frac{(2n+3)\cdot(n+3)}{(n+4)\cdot(n+3)} - \frac{2n\cdot(n+4)}{(n+3)\cdot(n+4)}$ 

$$= \frac{2n^2+3^2+3^2-(2n^2+3n^2)}{n^2+7n+42}$$

$$= \frac{6}{n^2+7n+42} - 70$$

G) Birch long night replie widen, Folge;) stript monoton

ii)  $6\pi \frac{n+4}{6^{n+4}} - \frac{n}{4^n} = \frac{n\cdot 4^n}{4^{n+4}} - \frac{n\cdot 4^{n+4}}{4^{n+4}} + \frac{n}{4^{n+4}} + \frac{n}{4^{n$
